MATEI P. IORDANESCU

Student Data Scientist & AI Researcher

Acton, MA | (847) 469-3374 | matei.p.iordanescu@gmail.com
GitHub: github.com/Mateiio | LinkedIn: linkedin.com/in/matei-iordanescu-750541370

High school student with strong interests in computer science, artificial intelligence, and data science. Coding instructor, workshop leader, and American Computer Science League (ACSL) competitor with hands-on experience in programming, problem-solving, and technical research.

EDUCATION

Acton-Boxborough Regional High School, Acton, MA

Expected Graduation: 2028 | GPA: 4.00/4.00 | High Honor Roll (2024–Present)

Relevant Coursework: Geometry Honors, Algebra II Honors, Biology Honors, Science Research

Additional Training:

- **Penguin Coding School (2020–2022):** Python, machine learning, data analysis, object-oriented programming, and app development; Completed capstone projects in exploratory data science and image classification using the MNIST dataset
- **RSM School of Mathematics (Grades 4–8):** Advanced coursework in problem solving, algebra, and geometry

TECHNICAL SKILLS

Programming: Python (Advanced), Lua, Java, C/C++

Machine Learning & AI: Convolutional Neural Networks (CNNs), Self-Supervised Learning (SSL), Transfer Learning, Generative AI, Image Classification & Segmentation

Data Science & Analysis: Statistical inference, experimental design, data visualization, image processing, NLP

Tools & Frameworks: PyTorch, TensorFlow, pandas, NumPy, Jupyter, Docker, Git/GitHub

RESEARCH & PROJECT EXPERIENCE

Deforestation Quantification in Satellite Imagery Using Self-Supervised & Generative AI

3rd Place, Local Science Fair; Advanced to Region IV Science Fair, Tufts University, March 2026

- Applied self-supervised learning and generative models to improve feature extraction
- Project Repository: Deforestation Quantification using Generative AI

Image Classification with Deep Learning

Region IV Science Fair, March 2025

- Trained an image classification model using deep learning and transfer learning
- Proposed applications in satellite image interpretation and environmental monitoring
- Selected for Student Symposium Showcase (September 2025)

LEADERSHIP & COLLABORATION

Data Science Lead — ABRHS Research Club | *December 2024–Present*

- Designed and led student workshops on machine learning, inferential statistics, and image processing
- Developed instructional materials and live demonstrations for Research Club

Workshop Materials:

- Machine Learning & Probability: View Materials
- Inferential Statistics: View Materials
- Image Processing: View Materials

Founder — CodeKombat Coding Club | *December 2021–Present*

- Founded a student-led Python and AI club to mentor beginner programmers
- Developed open-source educational content and interactive workshops

Founder — Project Ground Guardian | *June 2020–Present*

- Environmental research initiative to study backyard wildlife using field observation and data analysis
- Designed data collection workflows to explore ecological patterns
- Website: Project Ground Guardian

TEACHING EXPERIENCE

Coding Instructor — Penguin Coding School | *October 2025–Present*

- **Python (Beginner and Intermediate):** User-defined functions, data structures (lists, dictionaries), string manipulation, introduction to object-oriented programming
- **Roblox Coding (Beginner):** Lua scripting and Roblox Studio for designing and customizing interactive worlds

COMPETITIONS

American Computer Science League (ACSL) | *Competed annually, 2021–2026*

- Progressed through Junior, Intermediate, and Senior divisions
- Consistently ranked in top divisions with ongoing participation in Senior 5 (2025–26)

ACTIVITIES & INTERESTS

- ABRHS Swim Team: Helped team secure 2nd place at the 2026 DCL Championships
- Karate: Purple Belt
- Guitar
- Languages: Romanian (Fluent), French (Conversational)
- Environmental Science & Ecology Research
- Early Entrepreneurial Leadership: Designed, handcrafted, and sold original toys; ran a candy resale business generating about $100 per week at age ten
- Culinary Arts & Gardening: Growing produce and baking artisan pastries; creating handcrafted textiles
